

Rachel Altman

Final Project

**1. Screenshot of the application's home page displayed in your browser.**

**2. Explanation of additional features, if any.**

I did not add any additional features.

**3. Explanation of status, stopping point, and issues if incomplete.**

I ended the final project completing everything.

**4. Discuss the easy and challenging parts of the assignment. How did you overcome all or some of the challenges?**

The easy part of this assignment was adding the security measures as well as adding the RSVP feature.

The challenging part of this assignment was fixing my error with the edit connection now not working. In order to complete it, I contacted a TA and they helped me understand my errors.
